Solutions

1. B — The grey piece and the right piece together fill a 3 × 4 rectangle: 12 – 5 = 7 squares, in exactly the shape of the gap. Piece B (turned) fills it; the others have a square too many, too few, or in the wrong place.

2. A — The grey piece and the right piece together fill a 4 × 5 rectangle: 20 – 10 = 10 squares, in exactly the shape of the gap. Piece A (turned) fills it; the others have a square too many, too few, or in the wrong place.

3. C (4) — The smallest rectangle around the grey piece is 3 × 4 = 12 squares. 12 – 8 = 4.

4. A (6) — The smallest rectangle around the grey piece is 4 × 4 = 16 squares. 16 – 10 = 6.

5. D (3 and 4) — Pieces 3 and 4 have 9 squares together and fit into a 3 × 3 rectangle. No other pair does.

6. A (2 and 4) — Pieces 2 and 4 have 15 squares together and fit into a 5 × 3 rectangle. No other pair does.

7. C — Two copies have 10 squares, so the rectangle is 1 × 10 or 2 × 5. Only two copies of piece C fit together like that. [set-03/by_level/Grade_03-04/2007 Q8 · two_copies]

8. A — Two copies have 12 squares, so the rectangle is 1 × 12 or 2 × 6 or 3 × 4. Only two copies of piece A fit together like that. [set-03/by_level/Grade_03-04/2007 Q8 · two_copies]
